HACK: The first step can be done in advance and stacked in preparation for the execution of service/wrapping after sandwiches are assembled.

Fold the top third of the paper down.

Lay your sandwich in the center of the paper, with the top of the sandwich touching the top edge of the paper.

Next, from the bottom, fold the paper up to cover the majority of the sandwich.

Fold one side of the paper under the sandwich, then repeat on the other side.

That's a wrap! You can also use this same technique for hamburger buns, and hot sandwiches in insulated foil wraps.

This institution is an equal opportunity provider.
